ABOUT ME

Highly motivated and detail-oriented 2nd-year B.Tech in Computer Science student seeking a Front-End Development Internship. Possessing a solid foundational knowledge of HTML5 and JavaScript, backed by strong programming ability in Python and C++. Eager to apply analytical skills and technical foundations to contribute to the development of responsive, cross-browser compatible, and user-friendly web interfaces within a dynamic team environment.

EDUCATION

VELLORE INSTITUTE OF TECH

Sehore, Bhopal

2024-2028

NARAYANA JR CLG

Kalyan, Mumbai

2022-2024

Experience

Software Development Engineer Intern Bluestock Fintech, Pune

- Contributing to fintech-focused software development by assisting in building, testing, and maintaining application features.
- Working with structured data, APIs, and backend logic while following clean coding practices and version control workflows.
- Collaborating with team members to debug issues and improve application reliability in a production-oriented environment.

Cyber Security Intern Teachnook(Wipro)

- Gained foundational exposure to cybersecurity and ethical hacking concepts through hands-on learning.
- Designed and developed a Python-based web crawler that systematically scans websites, extracts all accessible links, and compiles the results into a structured PDF report for analysis and documentation.

SKILL

- Programming Languages: Python, C++, Javascript, Bash Scripting
- Operating Systems: Linux (Ubuntu, Kali), Windows, macOS
- Project Coordination
- Team Leadership
- Time Management
- Git (Version Control)

EXPERTISE

- Administrative Efficiency
- Team Coordination
- Team Organization
- Task Prioritization
- Budget Management

PROJECTS

2025

SECURE FILE TRANSFER PROTOCOL (SFTP) IMPLEMENTATION

- Web Content Handling: Developed a high-efficiency web scraping tool using Python to perform OSINT data gathering.
- Parsing: Utilized BeautifulSoup and Requests libraries to efficiently parse raw HTML content and reliably extract specific web elements (URLs, email addresses, and file paths).
- Conceptual Alignment: Demonstrates hands-on experience in working with web structure and data retrieval, a skill transferable to understanding RESTful APIs and Fetch requests.

Technologies: Python, Requests, BeautifulSoup, Urllib

2024

PYTHON WEB CRAWLER AND DATA SCRAPER

- System Development: Engineered a secure client-server file transfer system utilizing Python and Socket Programming.
- Architecture: Designed and implemented multi-layer security features, including user authentication and robust access control measures to manage data confidentiality.
- Technologies: Python, PyCryptodome, Socket Programming, OpenSSL
